## Education

---

**B.Tech in Computer Science and Engineering:** Veer Surendra Sai University of Technology *Expected 2027*  
CGPA: 9.16 (Up to 4th Semester)

**Intermediate:** DAV Public School, Pokhariput *2022*  
Percentage: 94.4%

## Skills

---

**Programming Languages:** C, C++, Python, SQL

**Data Science:** MySQL, Pandas, NumPy, Matplotlib, Seaborn

**Frontend:** HTML, CSS, JavaScript, React, Tailwind CSS, Streamlit

**Backend:** Flask, MongoDB, ExpressJS, API Integration

**Machine Learning:** Scikit-Learn, TensorFlow, Computer Vision

## Achievements

---

### JPMorgan Chase & Co. – Code for Good 2025

- Selected among **top 0.17%** (from 65,000+ applicants) to be part of the final 108 invited to the Mumbai office.
- Engineered a functional prototype within 24 hours using collaborative coding and data analysis, assisting Purnata NGO by visualizing human trafficking patterns and prioritizing resource allocation in high-risk districts.

### Myntra HackerRamp: WeForShe 2024

- Advanced to Phase 2 by designing and implementing features for an inclusive fashion e-commerce platform, ranking in the top **4.1%** of participants and demonstrating scalable solution development.

### The Hyperloop Effect – IIT Madras

- Finalist among top **3%** of teams by developing a detailed project plan with design analysis and resource coordination, improving feasibility evaluation and execution strategy.

### Ideathon – IIT Bhubaneswar & BIS

- Won **1st Prize** by developing an innovative solution on “*Integrating Reimagining Core Branches with AI*”, demonstrating effective problem-solving, teamwork, and practical implementation under competitive timelines.

## Experience

---

**Research Intern,** IIT Bhubaneswar

*Winter 2024*

*Under Dr. Devashree Tripathy*

- Researched GPU vs. CPU performance using CUDA in GPGPU programming, achieving up to 10x speedup in matrix operations.

## Projects

---

### Job Recommendation System — HTML, CSS, JavaScript, Streamlit, Machine Learning ([View Project](#))

- Achieved personalized job recommendations for users by developing an AI-powered system using profile data and skills, resulting in improved job-seeker engagement.
- Increased relevance of suggested jobs by implementing similarity-based matching algorithms, enhancing user interaction and satisfaction.

### Internship Reminder Extension — MERN Stack, Manifest V3, Twilio API ([View Project](#))

- Increased internship tracking efficiency by 40% by developing a browser extension that saves opportunities from LinkedIn, Instagram, and YouTube directly to a centralized dashboard.
- Ensured 100% on-time application submissions by automating SMS deadline reminders via Twilio and synchronizing data in real-time using the MERN stack.

### Designer's Corner — React.js, Vite, Tailwind CSS, Node.js, Express, MongoDB, Cloudinary ([View Project](#))

- Built a full-stack platform for designers to submit and showcase creations by category, using React (Vite), Tailwind CSS, Node.js, Express, MongoDB, and Cloudinary, efficiently handling a large, distributed database.
- Implemented profile dashboards, voting, and sponsorship features, enabling designers to track submissions, gain exposure, and facilitate engagement from companies and the public.

## Extra-Curricular Activities

---

- Tata Imagination Challenge: Semi-Finalist**, progressed through two competitive rounds.
- Secured **2nd Prize in RoboSumo at Innovision 2024**, NIT Rourkela's annual tech fest, as part of Team Dheera (VSSUT Robotics Society).
